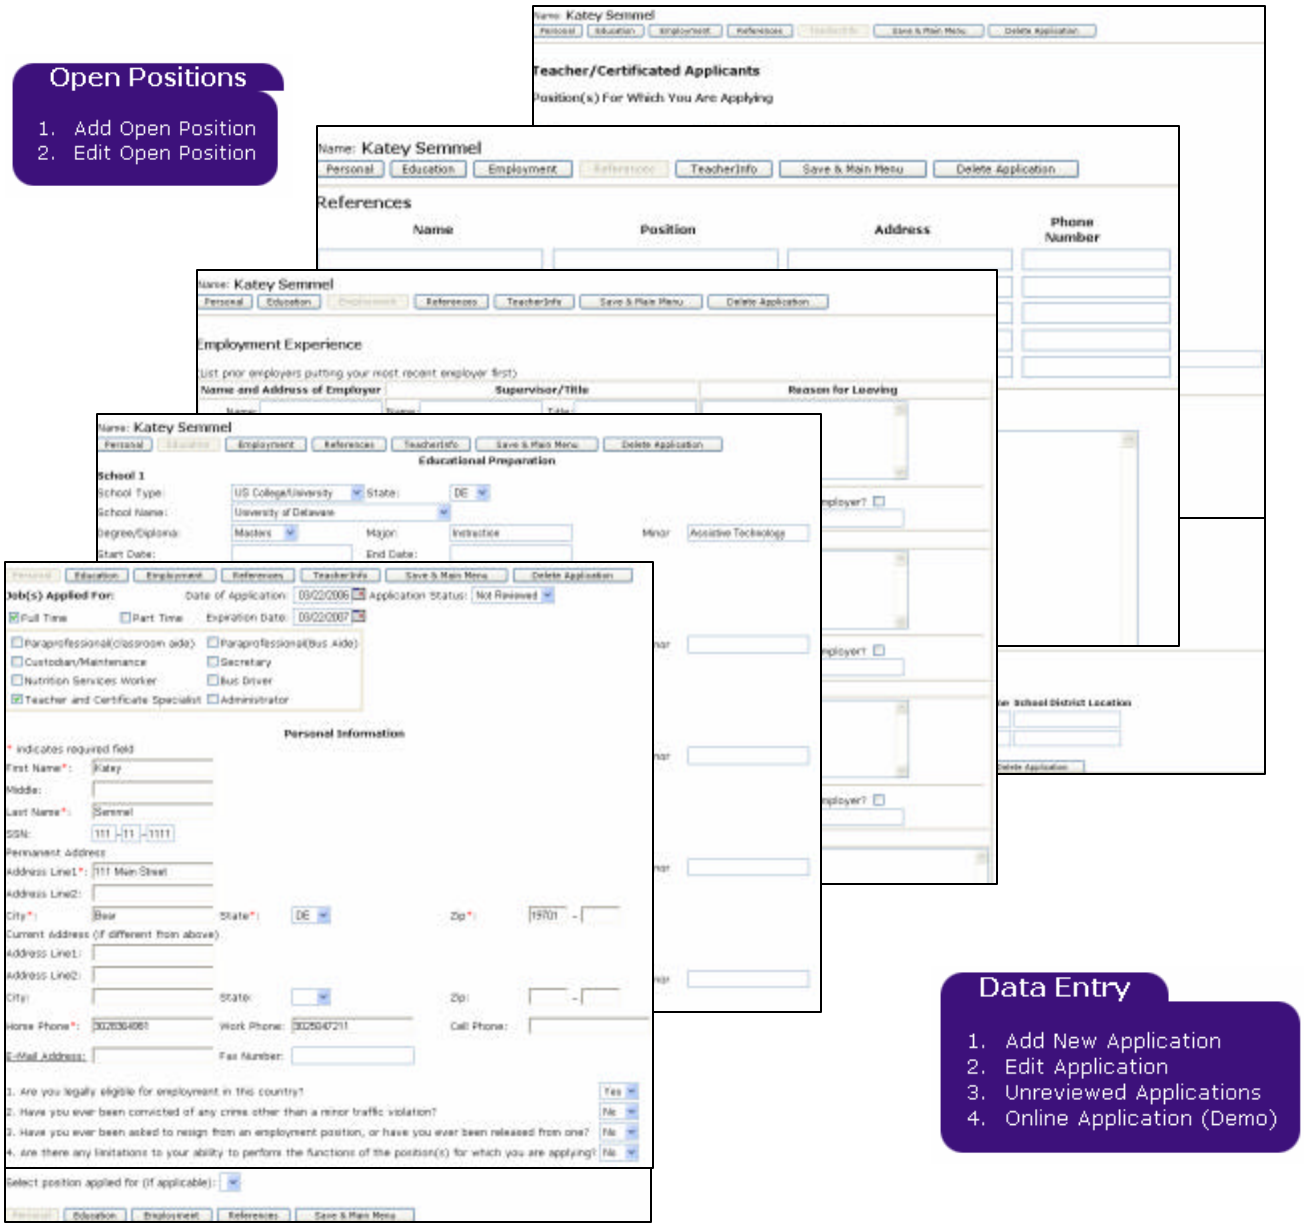
Data Service Center

Personnel Applicant Tracking

Whether entered by the applicant via a link from the district's web site or entered by district office staff, DSC's Personnel Applicant Tracking System makes the hiring process easier from start to finish. Applications are captured and held pending approval by appropriate district personnel. School administrators can have the ability to view approved applications. Open positions may optionally be defined, thus allowing applicants to associate their application with a specific position.



Professional Services:

DFMS Data Interface:	DFMS data extracted daily.
